*The information provided in this list is based on data obtained from the U.S. Patent and Trademark Office. For this report, a university is defined as an institution that grants undergraduate-level degrees. Patents reported are utility patents granted during the 2019 calendar year. When a patent is assigned to one or more entities, credit is given to the first named entity. The number of patents granted does not necessarily indicate the value of a university's technology, the effectiveness of its research or whether its patents will be successfully licensed and/or brought to market. For inquiries, or if you have a research foundation that should be combined with your university assignment in the future, contact: [info@academyofinventors.org](mailto:info@academyofinventors.org)*

The National Academy of Inventors is a member organization comprising U.S. and international universities, and governmental and non-profit research institutes, with over 4,000 individual inventor members and Fellows spanning more than 250 institutions. It was founded in 2010 to recognize and encourage inventors with patents issued from the U.S. Patent and Trademark Office, enhance the visibility of academic technology and innovation, encourage the disclosure of intellectual property, educate and mentor innovative students, and translate the inventions of its members to benefit society. [www.academyofinventors.org](http://www.academyofinventors.org)

The Intellectual Property Owners Association (IPO), established in 1972, is a trade association for owners of patents, trademarks, copyrights, and trade secrets. IPO is the only association in the U.S. that serves all intellectual property owners in all industries and all fields of technology. IPO advocates for effective and affordable IP ownership rights and provides a wide array of services to members, including: supporting member interests relating to legislative and international issues; analyzing current IP issues; information and educational services; and disseminating information to the general public on the importance of intellectual property rights.
